PROFILE

PHP Full Stack Developer specialized in Symfony and Laravel, with over 3 years of experience designing, developing and maintaining web applications and business ERPs. Experience with management systems used by public and private institutions. Skilled in secure REST API development (Symfony, Laravel Sanctum), PostgreSQL/MySQL databases, application maintenance and Linux deployment.

EXPERIENCE

12/2023 - Present: Full Stack Developer at COSIT Benin, Cotonou, Benin.

- **Business ERP Development: Design, optimization and maintenance of complex web applications in PHP/Symfony (General Accounting, HR/Payroll, Budget Tracking, Stock Management modules).**
- **Institutional Deployment: Integration and delivery of critical solutions and Monitoring & Evaluation systems for major state and ministerial structures (Ministry of Health, Ministry of Planning of Congo, ABSSA, ABT, ANaGeM, INF, UNSTIM, FNDA, INRAB, MCVT, PAVICC).**
- **Architecture & APIs: Design, securing and generation of robust REST APIs with Symfony.**
- **DevOps & Infrastructure: Application deployment and maintenance on remote Linux servers via SSH protocols and cPanel interfaces.**
- **User Training & Client Support: Training users, supporting and following up with clients until full software adoption, fixing issues and continuous improvement, as well as designing user guides for each module to facilitate adoption and user autonomy.**
- **Technical Mentoring: Supervision, guidance on final-year projects and internship supervision for 2nd and 3rd year students (INSPEI, FAUCON).**

06/2023 - 11/2023: COSIT Benin, Full Stack Developer Intern (Professional Internship), Cotonou, Benin.

- Development of an employee career management module for the National Institute for Women (INF) SIG, an existing Symfony project.
- Data entry and processing on the ANEPIJ and PAVICC platforms.

09/2022 - 12/2022: COSIT Benin, Web Developer Intern (Academic Internship), Cotonou, Benin.

- Participation in the development and maintenance of internal web applications.

RECENT PROJECTS

MONITORING AND EVALUATION SYSTEM FOR ANNUAL WORK PLAN (AWP) MANAGEMENT :

- National Institute of Agricultural Research of Benin (INRAB)
- Ministry of Living Environment and Transport (MCVT)
- Ministry of Planning, Statistics and Regional Integration (PPBSE_MPSIR), Republic of Congo (Congo-Brazzaville)
- Project for Strengthening the Livelihoods of Smallholders and Women in the N'ZI Region (PREMOPEF)

INTEGRATED MANAGEMENT SYSTEM (ACCOUNTING, HUMAN RESOURCES, BUDGET TRACKING, PROCUREMENT) :

- National Market Management Agency (ANaGeM)
- The National Institute for Women (INF)
- National University of Science, Technology, Engineering and Mathematics (UNSTIM)
- Integrated Agricultural Value Chains Development Project (PDICVA)
- Benin Tourism Agency **(ABT): Computerized Monitoring and Evaluation System (modules: Planning Monitoring & Evaluation, Procurement)**
- Beninese Food Safety Agency (ABSSA)
- National Fund for Agricultural Development (FNDA): Integrated Management System (General Accounting, Personnel, Stock Management)
- Ministry of Health (MS): Integrated Management System (Procurement, Archiving and Administration)

City Adaptation to Climate Change Program (PAVICC): Integrated Management System (Planning Monitoring & Evaluation, General Accounting, Budget Tracking)

PERSONAL PROJECTS :
RENTAL MANAGEMENT PLATFORM - LOCATIA (LARAVEL 12 / REACT JS / POSTGRESQL)

- Design of a multi-tenant rental management web application (properties, tenants, leases, rent, payments) for owners - including those in the diaspora - and real estate agencies.
- Security & roles: Laravel Fortify authentication, strict multi-tenant isolation per organization, fine-grained roles and permissions (spatie/laravel-permission - 6 roles, 45 permissions), audit log (activitylog).
- Documents & signature: Automatic generation of PDF receipts and contracts (DomPDF) with verification QR codes, amounts in words, electronic fingerprint signature (SHA-256 hash and signing certificate).
- Business features: 5-step lease assistant with automatic schedules, 3-click payments with automatic allocation to the oldest outstanding balance, WhatsApp reminders, KPI dashboard with charts (Recharts), CSV/PDF exportable reports, tenant portal, global Ctrl+K search.
- Quality: 100 automated tests (Pest), code formatted with Laravel Pint, ESLint/Prettier.
- Stack: Laravel 12, PHP 8.2, React 19, TypeScript, Inertia.js, Tailwind CSS 4, PostgreSQL 16, shadcn/ui.

ADMINISTRATIVE MAIL MANAGEMENT APPLICATION (SMARTCOURIER - SYMFONY)

- Design of a web system for centralizing and tracking incoming/outgoing mail, designed to optimize administrative workflows in public institutions.
- Security: Implementation of secure authentication, strict access control and fine-grained role management (EasyAdmin / Doctrine ORM).
- Visualization: Development of a complete analytical dashboard with real-time charts (Chart.js and asynchronous AJAX requests).
- Stack: PHP 8, Symfony 6, Twig, MySQL, Bootstrap 5.

EXPENSE AND REVENUE MANAGEMENT APPLICATION (LARAVEL 12)

- Development of a financial management web application with Laravel 12
- Secure authentication with Laravel Breeze and Sanctum
- Full CRUD for expenses, revenues, categories and users
- Development of secure REST APIs with token authentication
- Roles and permissions management with Spatie Laravel Permission
- PostgreSQL database
- PDF export with DomPDF
- API testing with Postman

SKILLS

TECHNICAL SKILLS

- **Backend & APIs: PHP (8+), Laravel, Symfony, REST APIs (Sanctum / API Platform), MVC Architecture, Python, Java**
- **Frontend: JavaScript, Tailwind CSS, Bootstrap, Twig, Blade, Alpine.js, Vite, HTML5, CSS3**
- **Databases: PostgreSQL, MySQL, SQL query optimization**
- **DevOps & Tools: Git, GitHub, Postman, Docker (basics), UML**
- **Deployment: Linux environments, SSH protocols, cPanel**
- **Artificial Intelligence & Cloud: Generative AI (Concepts & LLMs), Google Cloud Skills.**
- **Office Tools: Microsoft Office (Word, Excel, PowerPoint, Outlook)**

LANGUAGE SKILLS

- **ENGLISH: Intermediate B1;**
- **FRENCH: Advanced.**

SOFT SKILLS

- Leadership, team management, availability, rigor, attention to detail, sense of responsibility, autonomy.
- Team spirit and ability to thrive in an international and multicultural environment
- Professional ethics and adaptability.

EDUCATION

2026: Google Cloud - Cloud Skills Certification

- Introduction to Generative AI: Fundamentals of generative AI, large language models (LLMs) and Google tools for building AI applications. (Click here to access the certificate).

2022 - 2023: IRGIB AFRICA UNIVERSITY, Cotonou, Benin

- State Professional Bachelor's Degree in Computer Systems and Software (SIL).

2023: Backend PHP/Symfony Training

- Web development with PHP / Symfony
- SQL queries and backend architecture
- Development best practices

2019 - 2020: CEG SEKANDJI

- Baccalaureate Series D
